

To Whom it may concern

RE: The performance of Momentum Mechanical

As the Yard & Building Maintenance Supervisor for Bison Transport I have had to call on Zach many times. His professionalism has always been much appreciated during the large number of jobs he has in our Calgary Terminal, sometimes above and beyond what was needed.

During the install of our DPF equipment, Zach not only helped assist in the correct layout and assembly of the units, but also created specific switches to meet the desires of the Shop manager, and even came in to rewire the machine which had come from the factory with a reversed polarity. He has also provided with trouble shooting assistance for various other equipment and wiring needs in the terminal.

He has always been punctual and has even made arrangements to come in and do jobs after hours so as not to impede the work of other employees at the terminal.

Overall Momentum Mechanical has provided Bison with fantastic service and will continue to do so during our Maintenance Shop Expansion in the near future.

Sincerely

Shaun Booth
